

Green Collar Futures:

Arenas of Practice

The GCF curriculum guild divides naturally between hard skills & soft skills. Diagram 3) is the reference from which these illustrations of program-specific outputs is generated.

Here again, key features include redundancy & functional interconnection -- webs emerge, and balance is created. This balance of hard and soft skills produces solid, stable graduates, which bolsters GCF, and therefore the local economy, which lends more strength back to GCF -- continually evolving into something that may be called a node of permanence within the region (with the understanding that nothing actually is)..

In so doing, GCF creates self-perpetuating upward spirals of healthy, magnificent growth.
